

PLANNED TREATMENT

Right-eye cataract surgery

Treatment estimate and admission plan

PROCEDURE	Phacoemulsification with foldable monofocal intraocular lens implantation for the right eye.
-----------	--

Patient	Rohan Mehta
Age / sex	64 years / Male
Patient ID	HESC-P-2604817
Consulting surgeon	Dr. Nisha Kapoor, MS Ophthalmology
Proposed admission	18 August 2026, 7:30 am
Expected discharge	18 August 2026, after post-operative review
Insurance provider	Harborline Health Assurance Pvt. Ltd.
Policy number	HLA-CP-26018473

Clinical indication

The patient has a visually significant age-related cataract in the right eye with reduced distance vision and glare. Surgery has been recommended after examination and discussion of expected benefits, alternatives, and possible risks.

VALIDITY	This estimate is valid for 15 days from 12 August 2026 and is subject to final clinical findings, implant availability, and the hospital's billing terms.
----------	---

ESTIMATE BREAKDOWN

Expected hospital charges

The following line items form the expected cost of the planned procedure. Amounts are in Indian rupees and may change if additional treatment is medically required.

Description	Qty	Unit rate	Amount
Cataract surgery package - right eye	1	62,000	62,000
Foldable monofocal IOL lens	1	18,000	18,000
Pre-operative investigations	1	3,500	3,500
Pharmacy and surgical consumables	1	8,500	8,500
Room and nursing charges	1 day	8,000	8,000

Estimated gross total	INR 1,00,000
Advance requested at admission	INR 25,000
Balance payable after discharge	Subject to final bill

Package inclusions

The surgery package includes the operating theatre, surgeon fee, anesthetist fee, routine nursing support, standard medicines used during the procedure, and one routine post-operative review. It does not include the intraocular lens, investigations, or pharmacy and consumables listed separately above.

INSURANCE NOTE

The final payable amount depends on the member's policy limits, waiting periods, sub-limits, co-payment, deductible, and the insurer's claim assessment.

TREATMENT PLAN

Procedure and care pathway

The care team will confirm the final clinical plan after the pre-operative assessment and before admission.

Before admission

Step	Details
Medical review	Confirm diagnosis, visual needs, medication history, allergies, and fitness for local anesthesia.
Investigations	Blood pressure, blood sugar where clinically indicated, biometry, and routine pre-operative eye measurements.
Medication instructions	Follow the surgeon's instructions about blood thinners, diabetes medicines, and fasting if applicable.
Documents	Bring a government identity document, policy e-card, prior prescriptions, investigation reports, and the estimate reference.

On the day of surgery

Stage	Expected process
Check-in	Registration and verification of patient and insurance details.
Procedure	Phacoemulsification with foldable monofocal IOL implantation in the right eye.
Observation	Short post-operative observation with eye pressure and vision checks.
Discharge	Discharge after the treating ophthalmologist confirms that the patient is stable.

ADDITIONAL
TREATMENT

If an additional procedure, upgraded lens, extended stay, or treatment of a new condition is required, the hospital will issue a revised estimate for approval.

BILLING AND AUTHORIZATION

Important terms

Please review these points before admission and share the estimate with the insurer's claims desk for pre-authorization where cashless treatment is requested.

Topic	Requirement
Cashless request	Submit the pre-authorization request through the hospital insurance desk at least 48 hours before planned admission.
Emergency contact	For an unexpected admission, notify the insurer within 24 hours and provide the admission number.
Non-payable items	Personal comfort items, attendant meals, registration charges, and expenses outside the approved treatment may be payable by the patient.
Final billing	The final bill is based on services actually provided and may differ from this estimate.
Refunds	Any unused advance is adjusted against the final bill or refunded according to the hospital's billing policy.
Consent	The patient or authorized representative must sign the hospital consent and financial responsibility forms before treatment.

Acknowledgement

I acknowledge that the above estimate has been explained to me. I understand that the final amount may change based on the treatment actually provided and the insurer's coverage decision.
